

Effective ASSIST Screening

01

Introduction to ASSIST

ASSIST stands for Alcohol, Smoking, and Substance Involvement Screening Test. It helps identify risky substance use behaviors.

02

Eight Core Questions

ASSIST involves eight key questions that assess the frequency and impact of substance use in respondents.

03

Scoring System

The responses are scored to determine the level of intervention needed, ranging from low to high risk.

04

Substance Use Categories

The tool covers various substances, including alcohol, tobacco, cannabis, cocaine, and opiates, to provide comprehensive screening.
